

*Flame Spray Technologies* is a dynamic organization, serving markets around the world in the area of thermal spraying. We offer a complete line of products dedicated to the thermal spray industry. In addition to complete turn-key systems, we also supply a complete line of consumables necessary for the thermal spray processes. For further detailed information please visit our web site; [www.fst.nl](http://www.fst.nl)

To strengthen our North American sales team we are looking for:

## Sales Engineer with good technical know-how

### Job Description

You will be responsible for: Growing customer base through development of new contacts and maintaining existing relationships.

Actively promoting and selling our products and services to customers in such a way that good relationships are built and further developed, both technically and commercially.

Reaching agreement with your customers on product and service pricing, delivery conditions and other relevant conditions.

Interfacing with project management to ensure your customers enjoy an efficient and successful installation of FST product.

### Requirements

Engineering degree with a commercial attitude. You have to be able to operate independently, be self motivating and a team player. It is preferred that you have experience working in an industrial environment and that you are prepared to become a specialist.

### Employment

Full time

### We offer

An interesting and challenging position in an internationally oriented company active in many different industries. Our company is growing and is pursuing a dynamic growth strategy and, therefore, offers significant growth opportunities for the right person. We offer competitive compensation, including a good benefits package.
